DC Vehicle
Wi-Fi Access Point
Installation Guide

Manual Version 1.0 | Revised 09/11/24

Included Parts

Ethernet cables not included.

Access Point

**DC PoE Injector
(Power over Ethernet)**

Instructions

Follow the steps below and refer to the diagram on page 2:

1   Power off the CloudBox.

2   Connect an ethernet cable between the CloudBox and the IN port on the PoE injector. (For CloudBox 2, connect the ethernet cable to Ethernet Port 2)

3   Connect another ethernet cable between the OUT port on the PoE injector and the Access Point.

4   Connect the VIN+ to 12VDC+ and connect the VIN- to ground (DC-).

5   Power on the CloudBox and PoE injector.
